Children learn best when they're engaged in real life. This guide shows you how to build your child's speech and language skills naturally, while brushing teeth, folding clothes, or setting the table. Just everyday chores — turned into language-rich moments for your child.

## Why It Works

- Encourages real conversation and emotional connection
  - Increases vocabulary + sentence structure
  - Great for children with speech delays or late talkers
- 

## While Brushing Teeth

"Toothbrush goes up-down. Now left-right."

"Let's open your mouth - wide!"

"Bubbles! Look at the bubbles!"

Use words like: brush, rinse, teeth, clean, mouth, foam, soft, done

## While Folding Clothes

"Can you find the blue towel?"

"Let's fold and make a square."

"This is papa's big shirt... and your small socks."

Use words like: fold, match, towel, shirt, big/small, colors, soft

## While Setting the Table

"One spoon for you... one for me."

"Where is the napkin?"

"The plate goes on the table. The glass goes next to the plate."

Use words like: plate, spoon, glass, under, next to, clean, round

## While Cleaning Up Toys

"Where's the lid? Let's close the box."

"We're putting toys inside the basket."

"Let's clean the blocks - red block goes in first!"

Use words like: inside, outside, clean, pick up, box, basket, colors

# Simple Tips to Make the Most of These Moments

- Speak slowly, clearly, and with expression
- Use short phrases and repeat key words
- Give space for your child to respond – even with gestures or babble
- Label actions (“wash,” “pour,” “fold”) as you do them
- Avoid asking too many questions – describe and invite instead

## Final Note from *Soulnest*

Use these small, shared moments to grow your child’s vocabulary, attention, and confidence – one chore at a time. No extra time. Just extra intention. ✨
